Checkpoint 2:

Reviews your projected total monthly income at retirement age from the North Carolina Retirement System pension plans, Social Security and, if applicable, the NC 401(k) Plan, NC 457 Plan and NC 403(b) Program, plus any assets included within the Retirement Income Calculator's Total Balance of Outside Savings, and Total Balance of Outside Pensions and Other Monthly Income.

Review the Sources of Your Retirement Income

The information below was used to estimate your potential, projected monthly income. If you have service in more than one system, the estimate and projected retirement age may not be accurate.

Plan name	Projected Monthly Income
Teachers' and State Employees' Retirement System	\$3,940
Legislative Retirement System	\$1,865
North Carolina 401(k)	\$1,560
North Carolina 457	\$1,560
North Carolina 403(b)	\$1,560
Outside Assets*	\$1,700
Outside Pensions**	\$0
Social Security ¹	\$1,700
Total	\$13,885

*Your outside assets are populated according to the Total Balance of Outside Savings you entered into Prudential's Retirement Income Calculator housed in your NC 401(k), NC 457 or NC 403(b) account.

**Your outside pensions are populated according to the Total Outside Pensions and Other Monthly Income you entered into Prudential's Retirement Income Calculator housed in your NC 401(k), NC 457 or NC 403(b) account.

¹This estimated Social Security income is calculated based on your current earnings and income projections. This estimate is not the result of coordination with the Social Security Administration and does not reflect your actual past earnings. You can access your Social Security Statement by visiting www.ssa.gov/myaccount.

Your Personal Gap Analysis

This valuable feature lets you know if you have a gap between what you may need in retirement and what your projected income could be.

The chart below illustrates the difference between the income you might have and the income you might need in retirement. To estimate your monthly income in retirement, we used your income sources within Checkpoint 2.

When we compare your projected monthly income to your projected monthly need, it seems that you may have a gap that needs to be closed in order to reach your retirement income goal.

Assumptions: To determine your income need in retirement, we multiplied your monthly pay when you become eligible to retire* by 0.80, because many experts suggest that individuals will need a monthly income in retirement equal to 80% of their pre-retirement pay.

*It is estimated that your pay at retirement will equal your current pay.

Checkpoint 3:

Offers illustrations of how saving more in your NC 401(k) Plan, NC 457 Plan and/or NC 403(b) Program account could potentially grow over 20 years, with surprisingly little impact on your current take-home pay.

Save More For Your Future

The chart below shows how saving more in a supplemental retirement savings plan* like the NC 401(k), NC 457 or NC 403(b) could impact your savings over time. The chart also estimates how your actual take-home pay might be affected — it's less than you might think!

Take home a little less, save a lot more...

If contribution amount =	Your monthly contribution =	Your take-home pay is reduced each month by: ¹	Your potential additional savings from these contributions over time: ¹
2%	\$72	\$54	\$26,011
4%	\$143	\$107	\$51,661
6%	\$215	\$161	\$77,672

*Amounts withdrawn from a 401(k) or a 403(b) tax-deferred retirement plan before age 59½ may be subject to a 10% federal income tax penalty, applicable taxes, and plan restrictions. Withdrawals are generally taxed at ordinary income tax rates. Amounts withdrawn from the NC 457 Plan are not subject to a 10% federal income tax penalty. Seek advice from a tax professional regarding withdrawals.

¹The chart above assumes before-tax contributions, and is based on your current pay and an assumed tax bracket of 25%. It does not take state or local taxes into account. Assumes a 5% annual return over 20 years. Data shown for illustrative purposes only. **You can lose money by investing in securities.**
