<b>Required Minimum Distributions</b>	The federal government dictates that minimum withdrawals must begin by a certain age, provided the member is no longer employed by the sponsoring employer. Failure to receive this annual required minimum distribution (RMD) may result in significant tax penalties. <sup>4,5</sup>

<sup>1</sup> Withdrawals may be subject to income tax and a 10% early withdrawal penalty if taken before age 59½.

<sup>2</sup> An outstanding loan balance not paid back at termination is taxable in the year of the default. Under the Tax Cuts and Jobs Act of 2017, for defaults related to termination of employment after 2017, the individual has until the due date of that year's return (including extensions) to roll over this amount to an IRA or qualified employer plan.

<sup>3</sup> Please note that if you terminate from service, requests for withdrawals or distributions from your account (not associated with retirement) will not be processed for 60 days.

<sup>4</sup> As of January 1, 2023, the IRS generally requires you to start taking required minimum distributions (RMDs) at age 73. On January 1, 2033, the RMD age increases to age 75.

<sup>5</sup> Due to Secure 2.0 legislation, the required minimum distribution (RMD) requirement does not apply to any assets designated as Roth within your Plan account. In addition, a surviving spouse may elect to be treated as the deceased plan participant for purposes of the RMD rules.
